

From *Sickcare* to Healthcare

Our Team

Robert Hartmann | Heidi Mäkitalo | Devayani Mohanraj | Sofia Pascolo

From *Sickcare* to Healthcare

Sickcare

- ▶ system is overburdened
- ▶ no capacity for prevention
- ▶ a lack of trust between patients and healthcare staff

Sickcare

- ▶ system is overburdened
- ▶ no capacity for prevention
- ▶ a lack of trust between patients and healthcare staff

Healthcare

- ▶ more capacity
- ▶ time for preventive care
- ▶ better overview of *superusers* with complex issues
- ▶ trust and co-operation between patients and healthcare staff

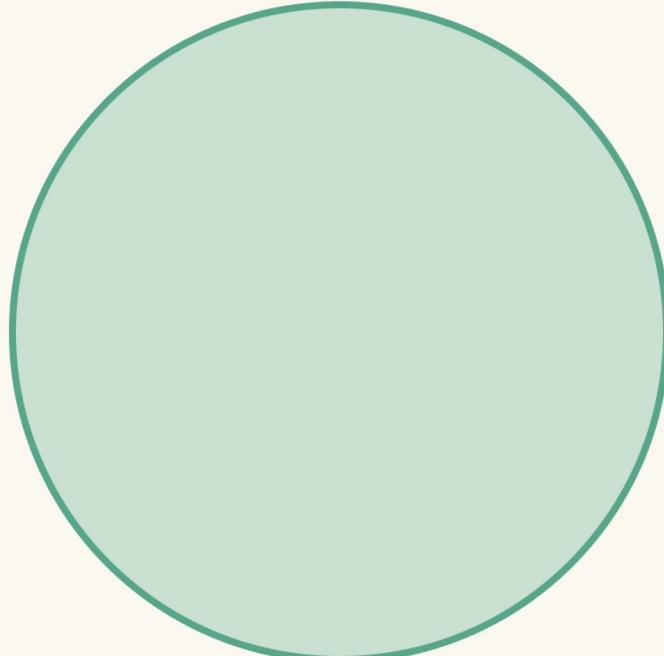

“ Sometimes [I think] that the doctors are not feeling they are dealing with human lives but only with **sickness**. ”

Patient with chronic illness, age 22

“ There are no health checkups, it's usually a sickness checkup. [It's] not health work, it's **sick work**. ”

Doctor with experience of working in the public primary healthcare

“Ping pong” role of patients

“ The patient has a ping-pong role, going from one professional to another ”

General Practitioner, Researcher at
Tampere University

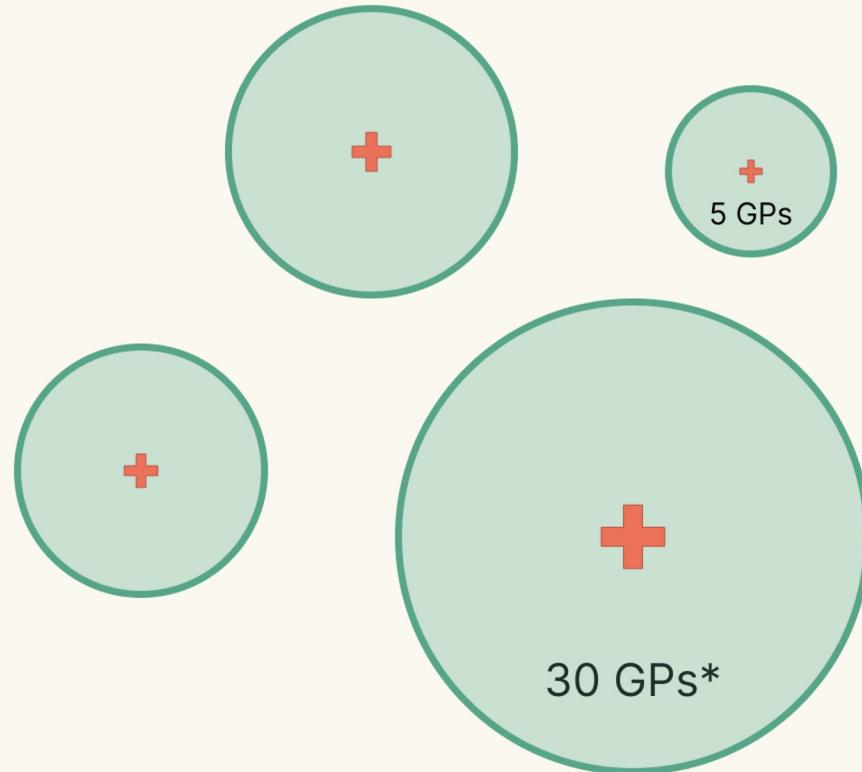

“Ping pong” role of patients → reduced Continuity of Care

Continuity of Care

A cohesive patient journey that allows for a broader overview of the patient's health.

“

Many of the issues being taken care of in healthcare centres need specific expertise. One doctor cannot manage all the information, and is not the best professional in all situations.
